HdM-Guide-App Redesign

Students participating in the interdisciplinary project, the software project and the production of interactive media, from the Mobile Media, Media Economics, Media Informatics and Media Publishing courses this semester have teamed up to create the new and improved version of the HdM app. This app has been redesigned to make the lives of each student at HdM a little easier and will be available in app stores soon!

The HdM-Guide-App is a permanent companion that allows for the ease of workday management.

HdM students were polled in the beginning of the semester and asked to choose their three favorite features of the current app. This information was used to understand the needs of students and what would best assist them in their daily lives.

Following the polling process and the evaluation of the results, the teams went to work. The design team began to develop mock-screens of the NEW HdM Guide App, compatible with both iOS and Android devices. The developing team used the mock-screens as a blueprint to program live apps that will be available for viewing and testing at this year's Media Night.

The new and optimized features include:

- An optimized search for people, rooms, events and lectures
- A calendar with daily, weekly and monthly overviews
- Cafeteria and Eat n´Talk menus
- Downloadable lecture notes provided by Professors
- Overview of grades
- Available in both German and English

Period:

winter semester 2016/ 2017

Adviser:

Prof. Dr. Ansgar Gerlicher
Prof. Dr. Wolfgang Gruel

Available in app stores beginning the 2017 summer semester!
